

Booking App available for patients

Book an appointment at the time, place and
with the clinician to suit your needs

At the time of registration you will be sent details of how to access our booking app. This works on any smartphone and can be downloaded from the App store or Google play. No patient details are held on the app and you will access via a patient reference number and password.

The app will allow you to:

1. Choose your appointment, your location and your clinician.
2. Cancel and rebook appointments as required.
3. Communicate with your clinician regarding your booked appointment.

Please note the app is a confidential system, available only to registered patients. It is not used for clinical information and no medical records are held on the app.

If you are unable to use the app or prefer to arrange in person, appointments can be booked and rearranged via our ops team.

***Please call 0300 0303 300 (Monday – Friday 8am-8pm, Sat 8am – 2pm) or email
